RESTAURANT & CAFE SPECIALISTS

OUR DESIGN PHILOSOPHY

To maximise the savings and profitability for our valued clients.

OUR KEY CONSULTANTS

RUSSELL WING

Furniture + Design Consultant

Having assisted in the refurbishments of many of Sydney's most iconic restaurants and venues, Russell's strengths will help you maximise your space and seating for your customers. His extensive background in furniture and textiles will help you design the stylish and practical finish required to suit any budget and lead time.

CREIGHTON CLAIBORNE

Screen + Design Consultant

Bringing over 10 years experience in the architectural and corporate sectors in Melbourne and Sydney, Creighton specialises in the development of our laser cut screen division and associated products to support A&D and end clients in dividing spaces, external facades, feature walls and signage adding privacy and aesthetics to their environment.

JERRY LIN

Marketing + Design Consultant

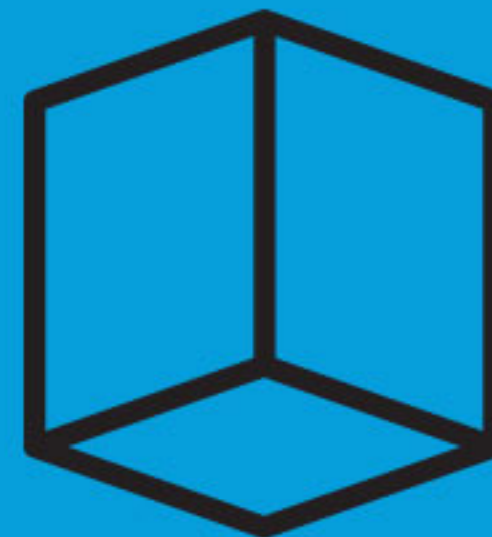

With a background in Architecture and Design, Jerry focuses on the form and function of a restaurant space to ensure correct flow and maximum productivity both for staff and patrons. Jerry also owns and operates a restaurant in Sydney and lends his time to consult with those starting out for the first time.

OUR SERVICE

We support and bring your vision to life setting you on a path to success. Everything we do is to help you make money.

HC Group offers a One Stop Shop for new build and refurbishments providing products and services from processing DA applications through to installation and even menu design.

As we are manufacturers, our workshops have saved our clients tens of thousands of dollars in designer and admin fees and 2-3 months in decision making. Our Workshops are perfect for those with a clear vision of what they want to achieve and who choose not to employ, or cannot afford to employ an interior architect/ designer for their restaurant.

We'll invest our time with you, getting to know you and your business. The process is collaborative and rewarding because it's *your* design we bring to life, *your* vision, *your* restaurant, *your* future!

PERFECT FOR NEW BUILD AND REFURBISHMENTS

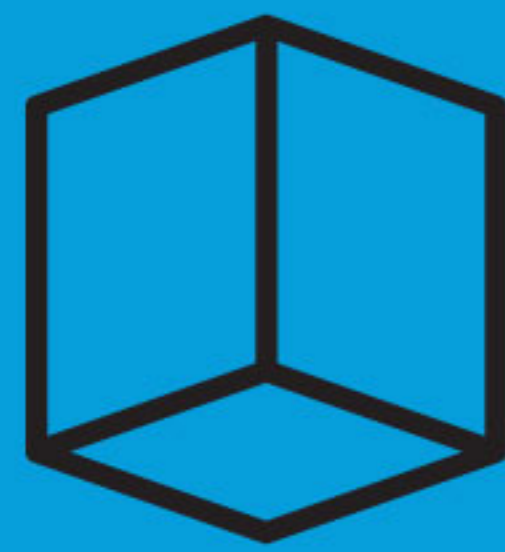

WHAT WE DO

DA APPLICATION

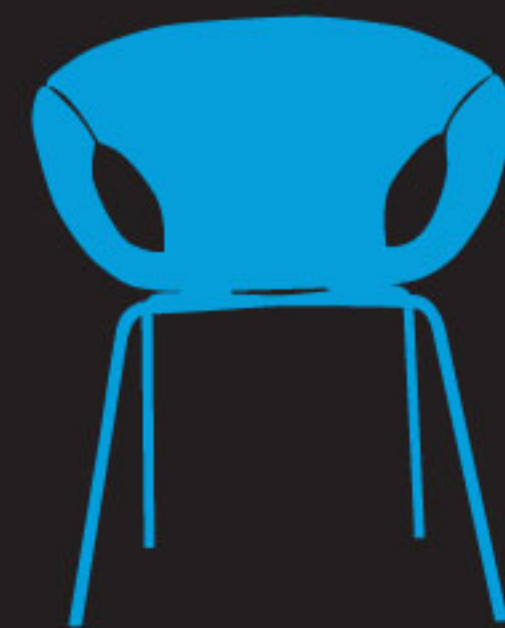

Working with you to process Development Approval is critical to timeline and manufacturing and ensures we have a clear vision ahead of us.

INTERIOR DESIGN

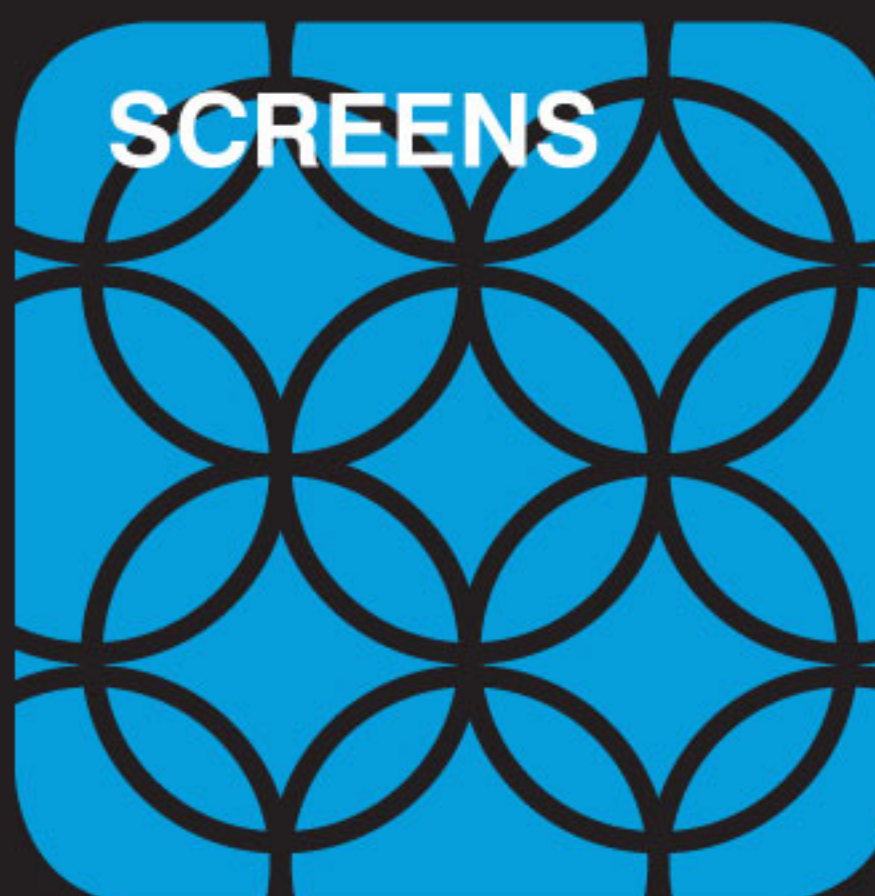

Through our design workshop and working with our team of consultants, we'll bring your vision and dream restaurant to life using our 3D model software. You'll have fun and grow in confidence as we guide you through each step of the process. We cost as we go ensuring all items fall within budget and lead time. All of this....in just one day!

FURNITURE

As manufacturers, we offer a large selection of chairs, barstools, drybars, booth seating, table tops and bases, as well as custom make, everything you could possibly need for your restaurant at factory prices.

SCREENS

We manufacture laser cut screens. Screens are a decorative, functional and cost effective way to divide spaces, offer privacy or create a stunning feature wall. You can incorporate your restaurant name and logo and choose from an extensive range of designs. Alternatively you can provide custom artwork for a completely bespoke piece.

KITCHEN EQUIPMENT

The engine room of any restaurant, we'll design and supply the right kitchen equipment for your venue. We'll introduce you to various brands and showrooms across Sydney where you're offered full training from professional chefs – they'll even cook your menu for you!

Question: Why invest hard earned cash in assets that depreciate? Consider using that money to drive your business forward. We offer a smart way to finance all kitchen equipment, furniture and screens that will take the financial pressure off you in the short term giving you the money and time to get up and running the right way and on the path to success.

Are you setting up for the first time? Seeing as you haven't traded yet, wouldn't it be great to have the flexibility of swapping, return and upgrading kitchen equipment as required? We'll tell you how!

Our marketing division will work closely with you to design logos and improving your branding.

Menu engineering will show you how the correct design and layout of your menu will maximise your profit.

We offer custom branding and signage which can be incorporated in a variety of items and materials for inside and out including cafe barriers, laser cut projection lighting and vinyl decals.

We take care of you from beginning to end. From demolition to installation we offer a full build and construction service bringing to life the design we've created together.

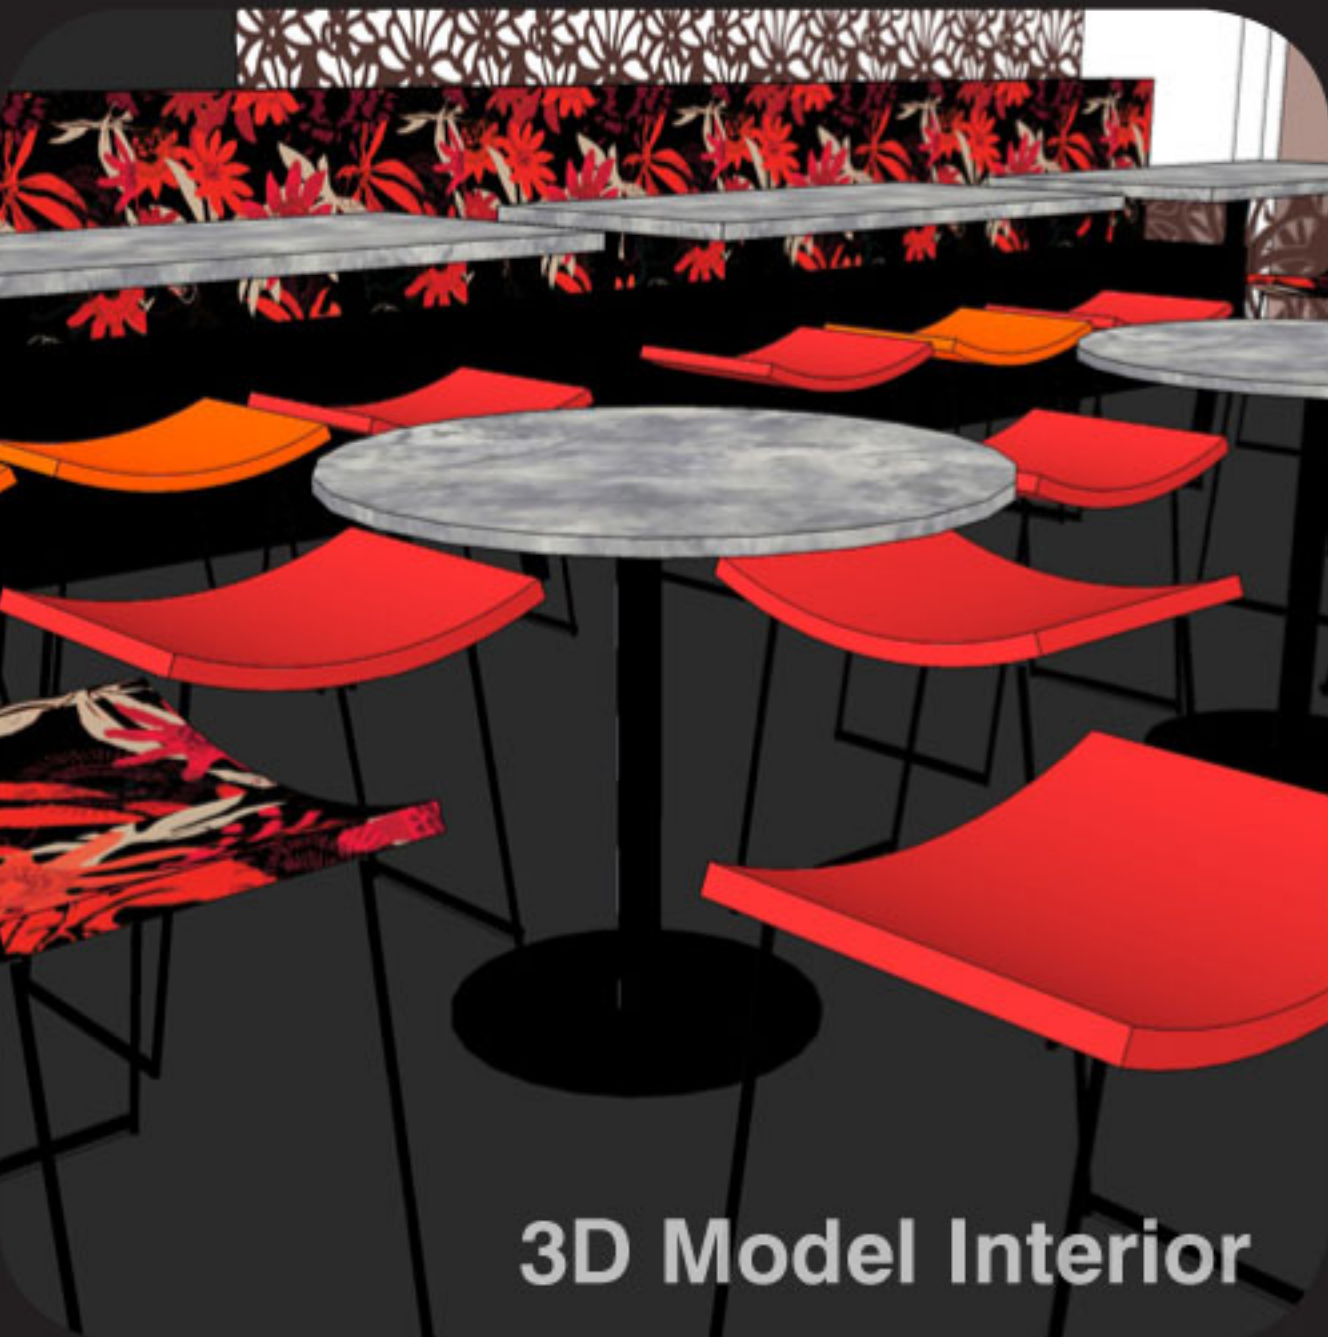

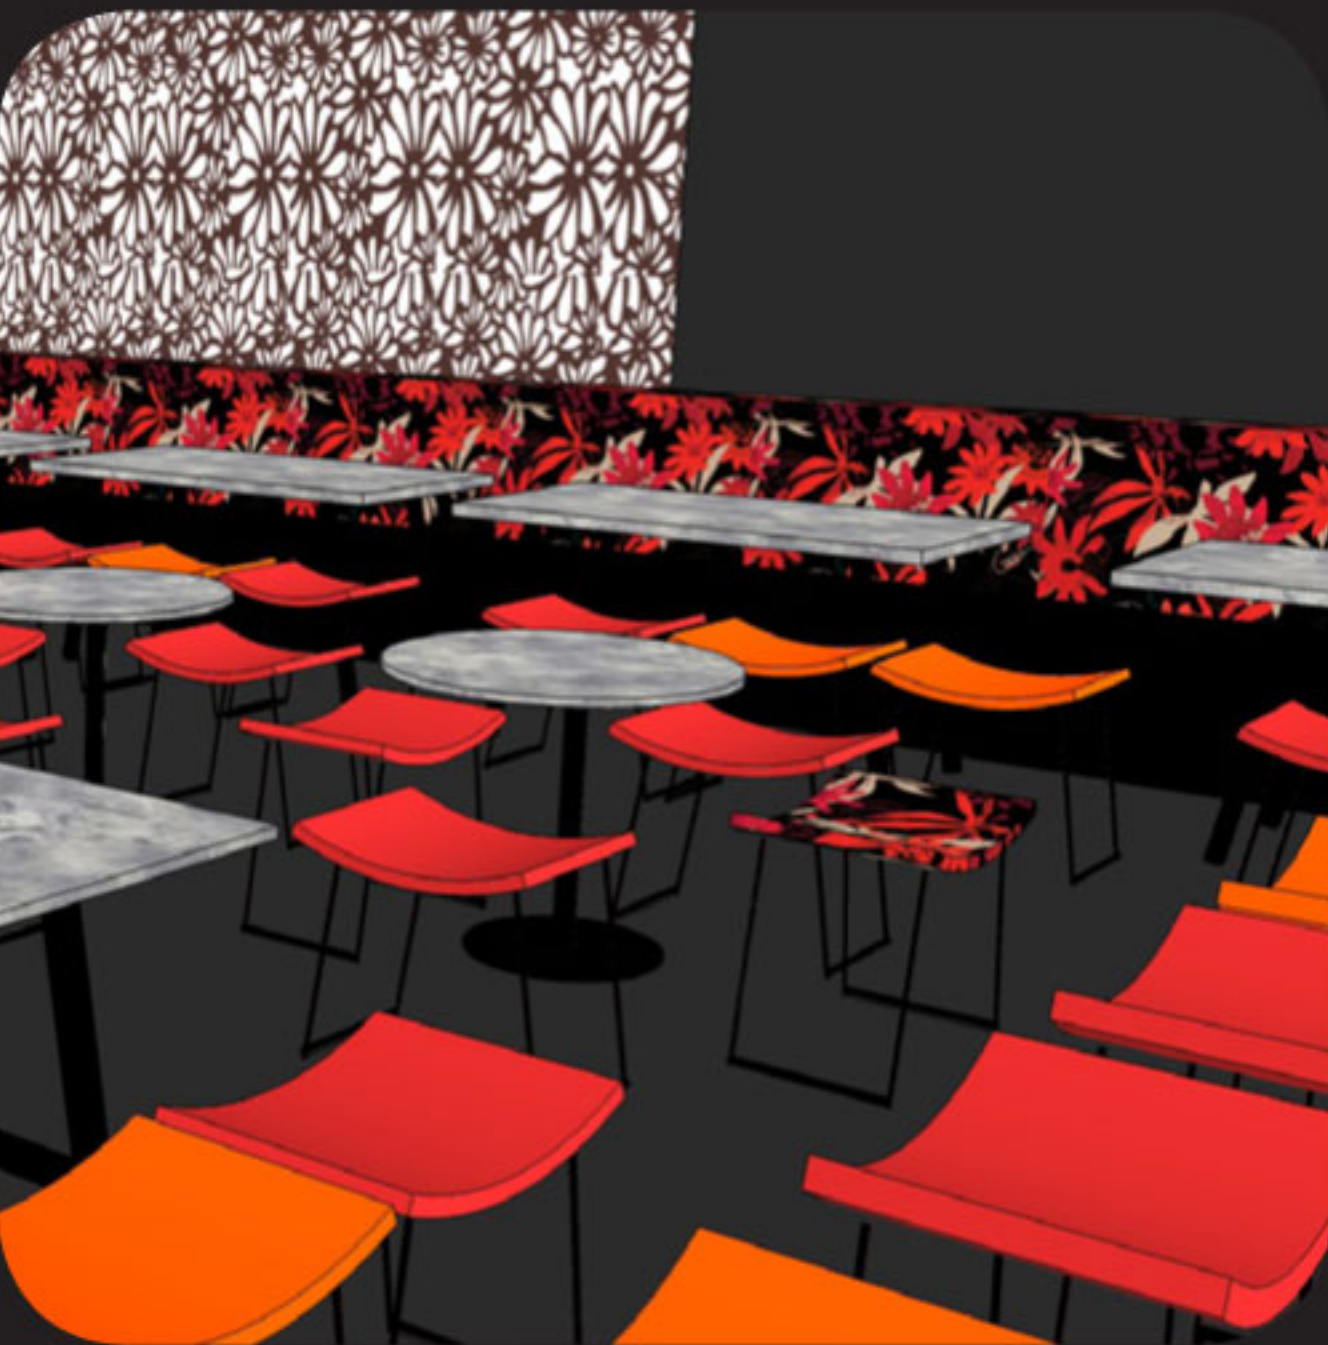

COMPLETED WORKSHOPS

ZEN NOODLE BAR

“You have an idea in your head and they make it come to life. For us we needed two defined areas, high seating on one side and low seating on the other. The atmosphere is happy and welcoming. We played around with different looks. I knew I was going to be happy with the result because I chose everything and now everything’s installed, it’s come out even better than I imagined. I’m very happy!”

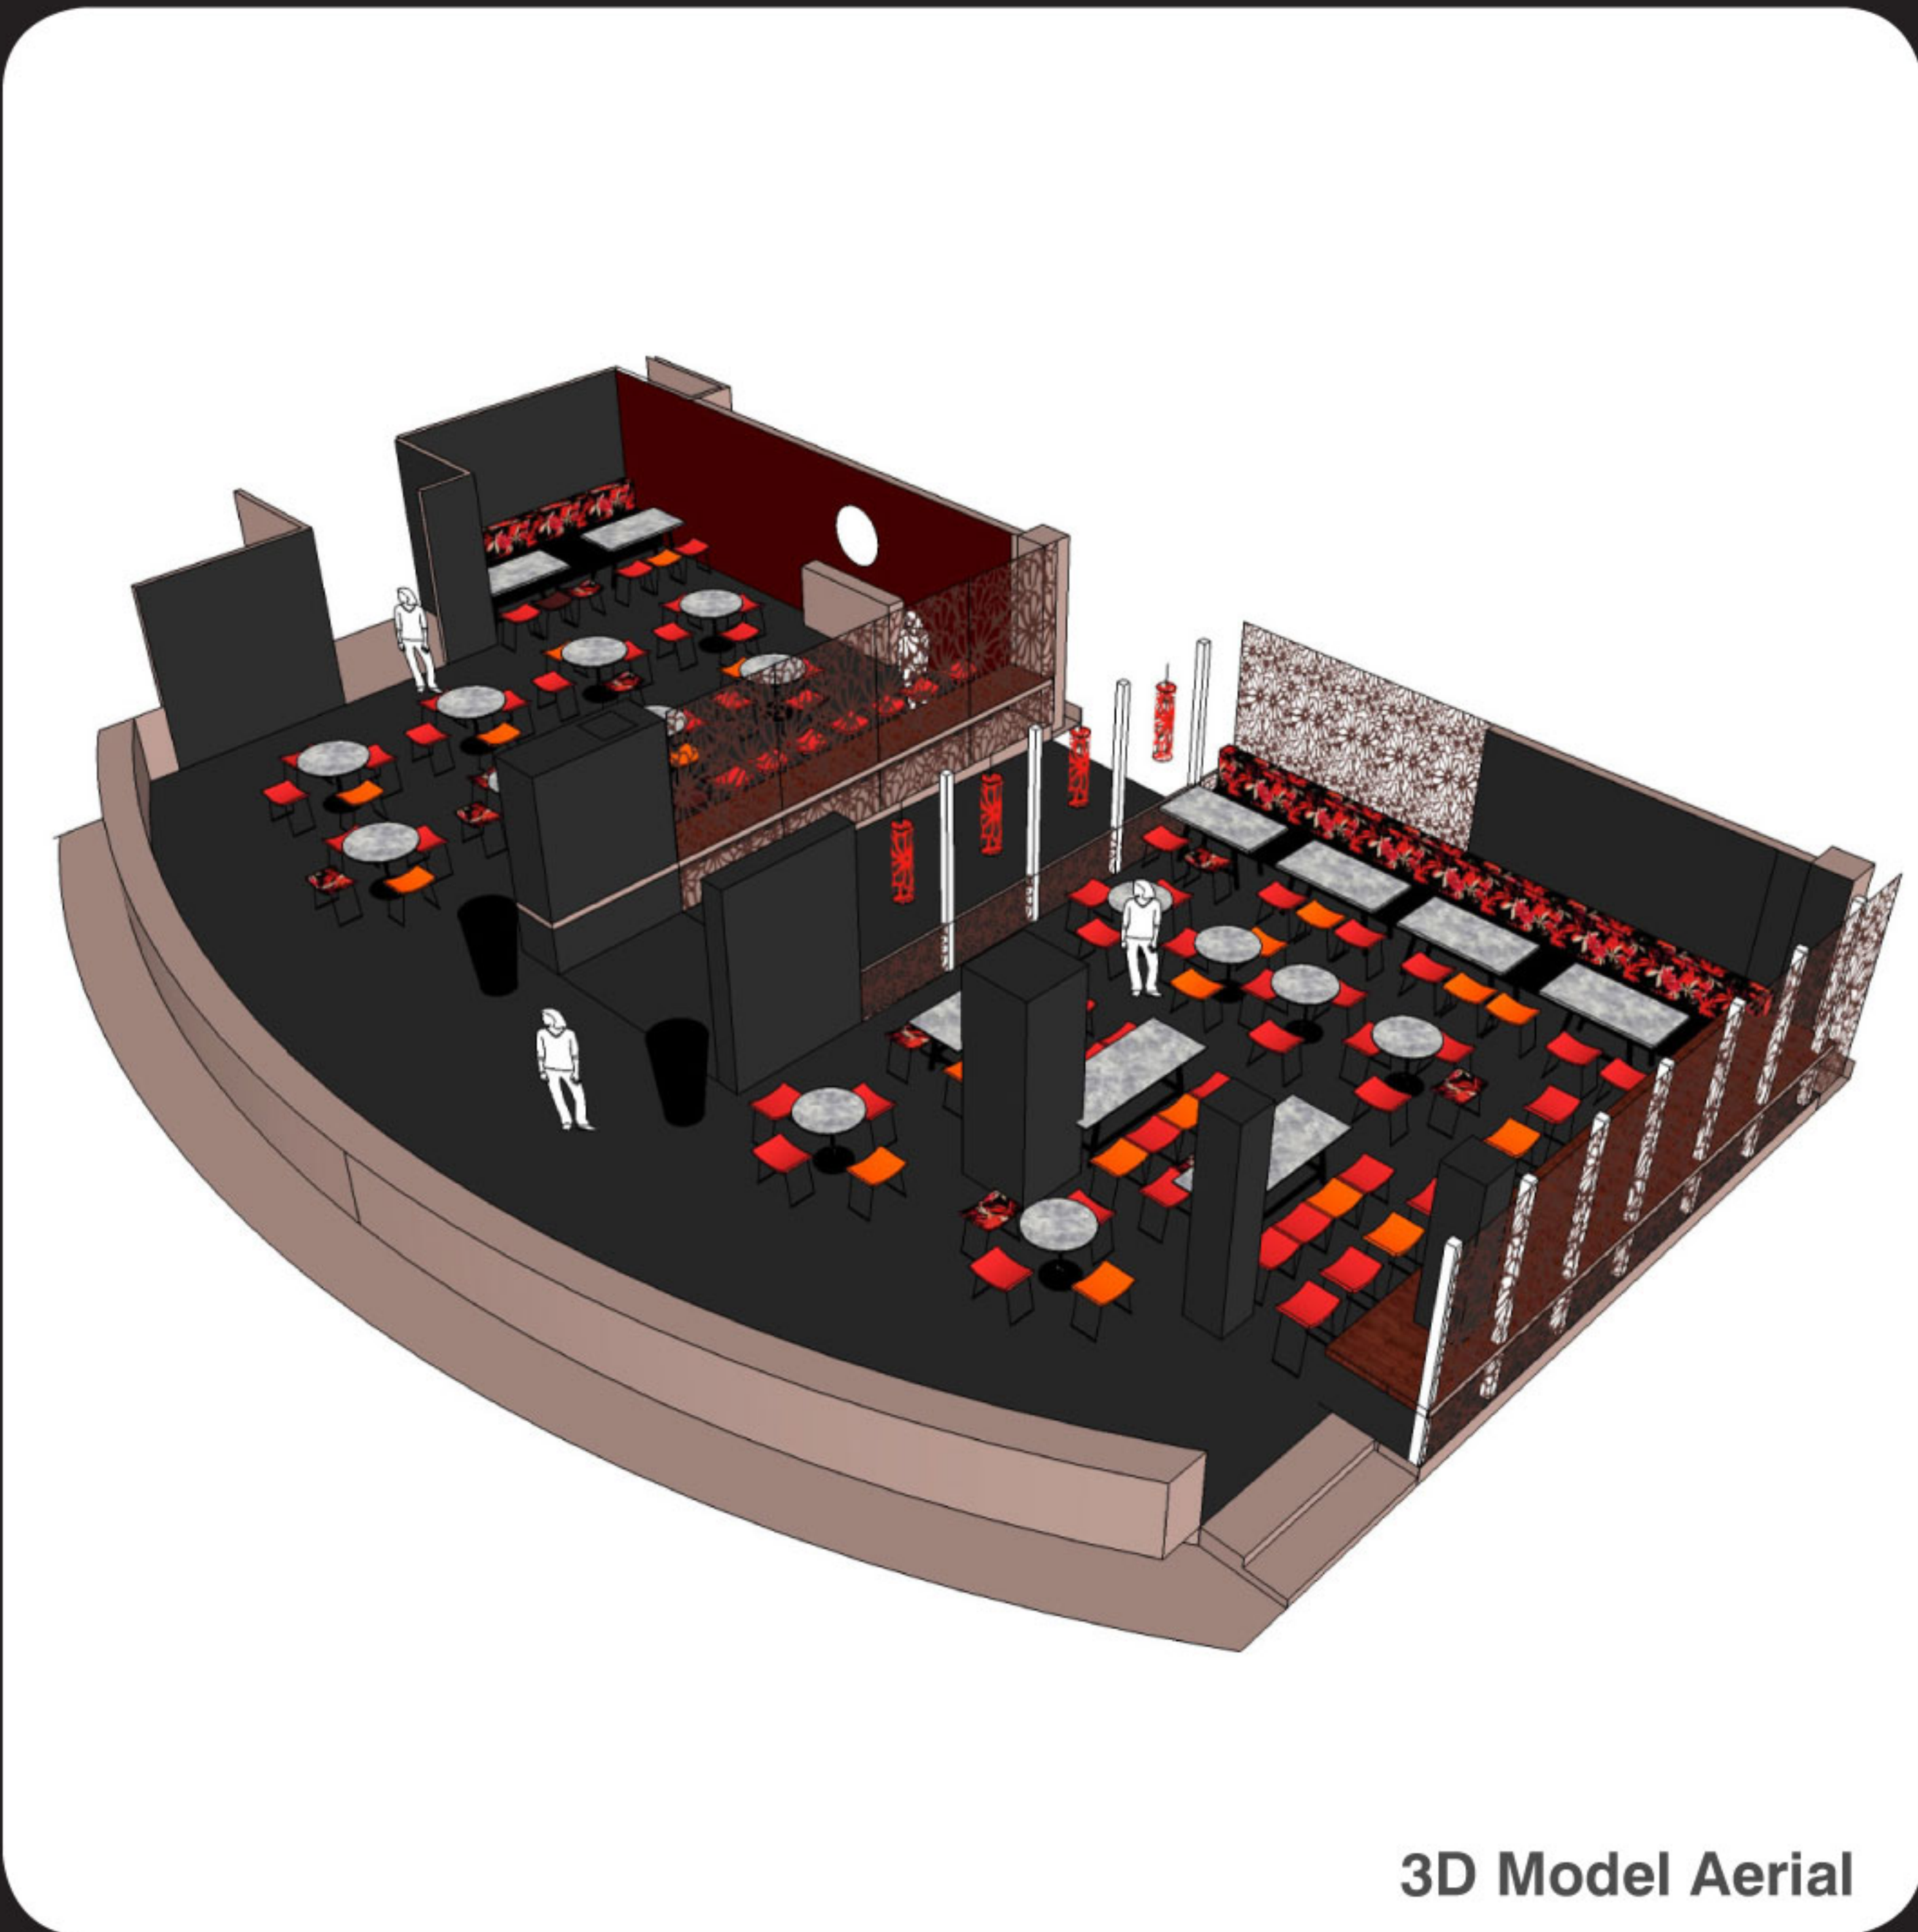

— John Chu (Owner of Zen Noodle Bar)

THE GRAND PAVILION

“Amazing! I cannot thank Russell and the team enough. The workshop was fantastic. We knew what we wanted but we changed the look so many times until it was just right. They show your new restaurant from every angle. This really helped us back on site to show our team what we were trying to achieve. Also, we knew we’d ordered exactly the right amount of furniture and the screens look so beautiful. Just so easy and a fantastic result.”

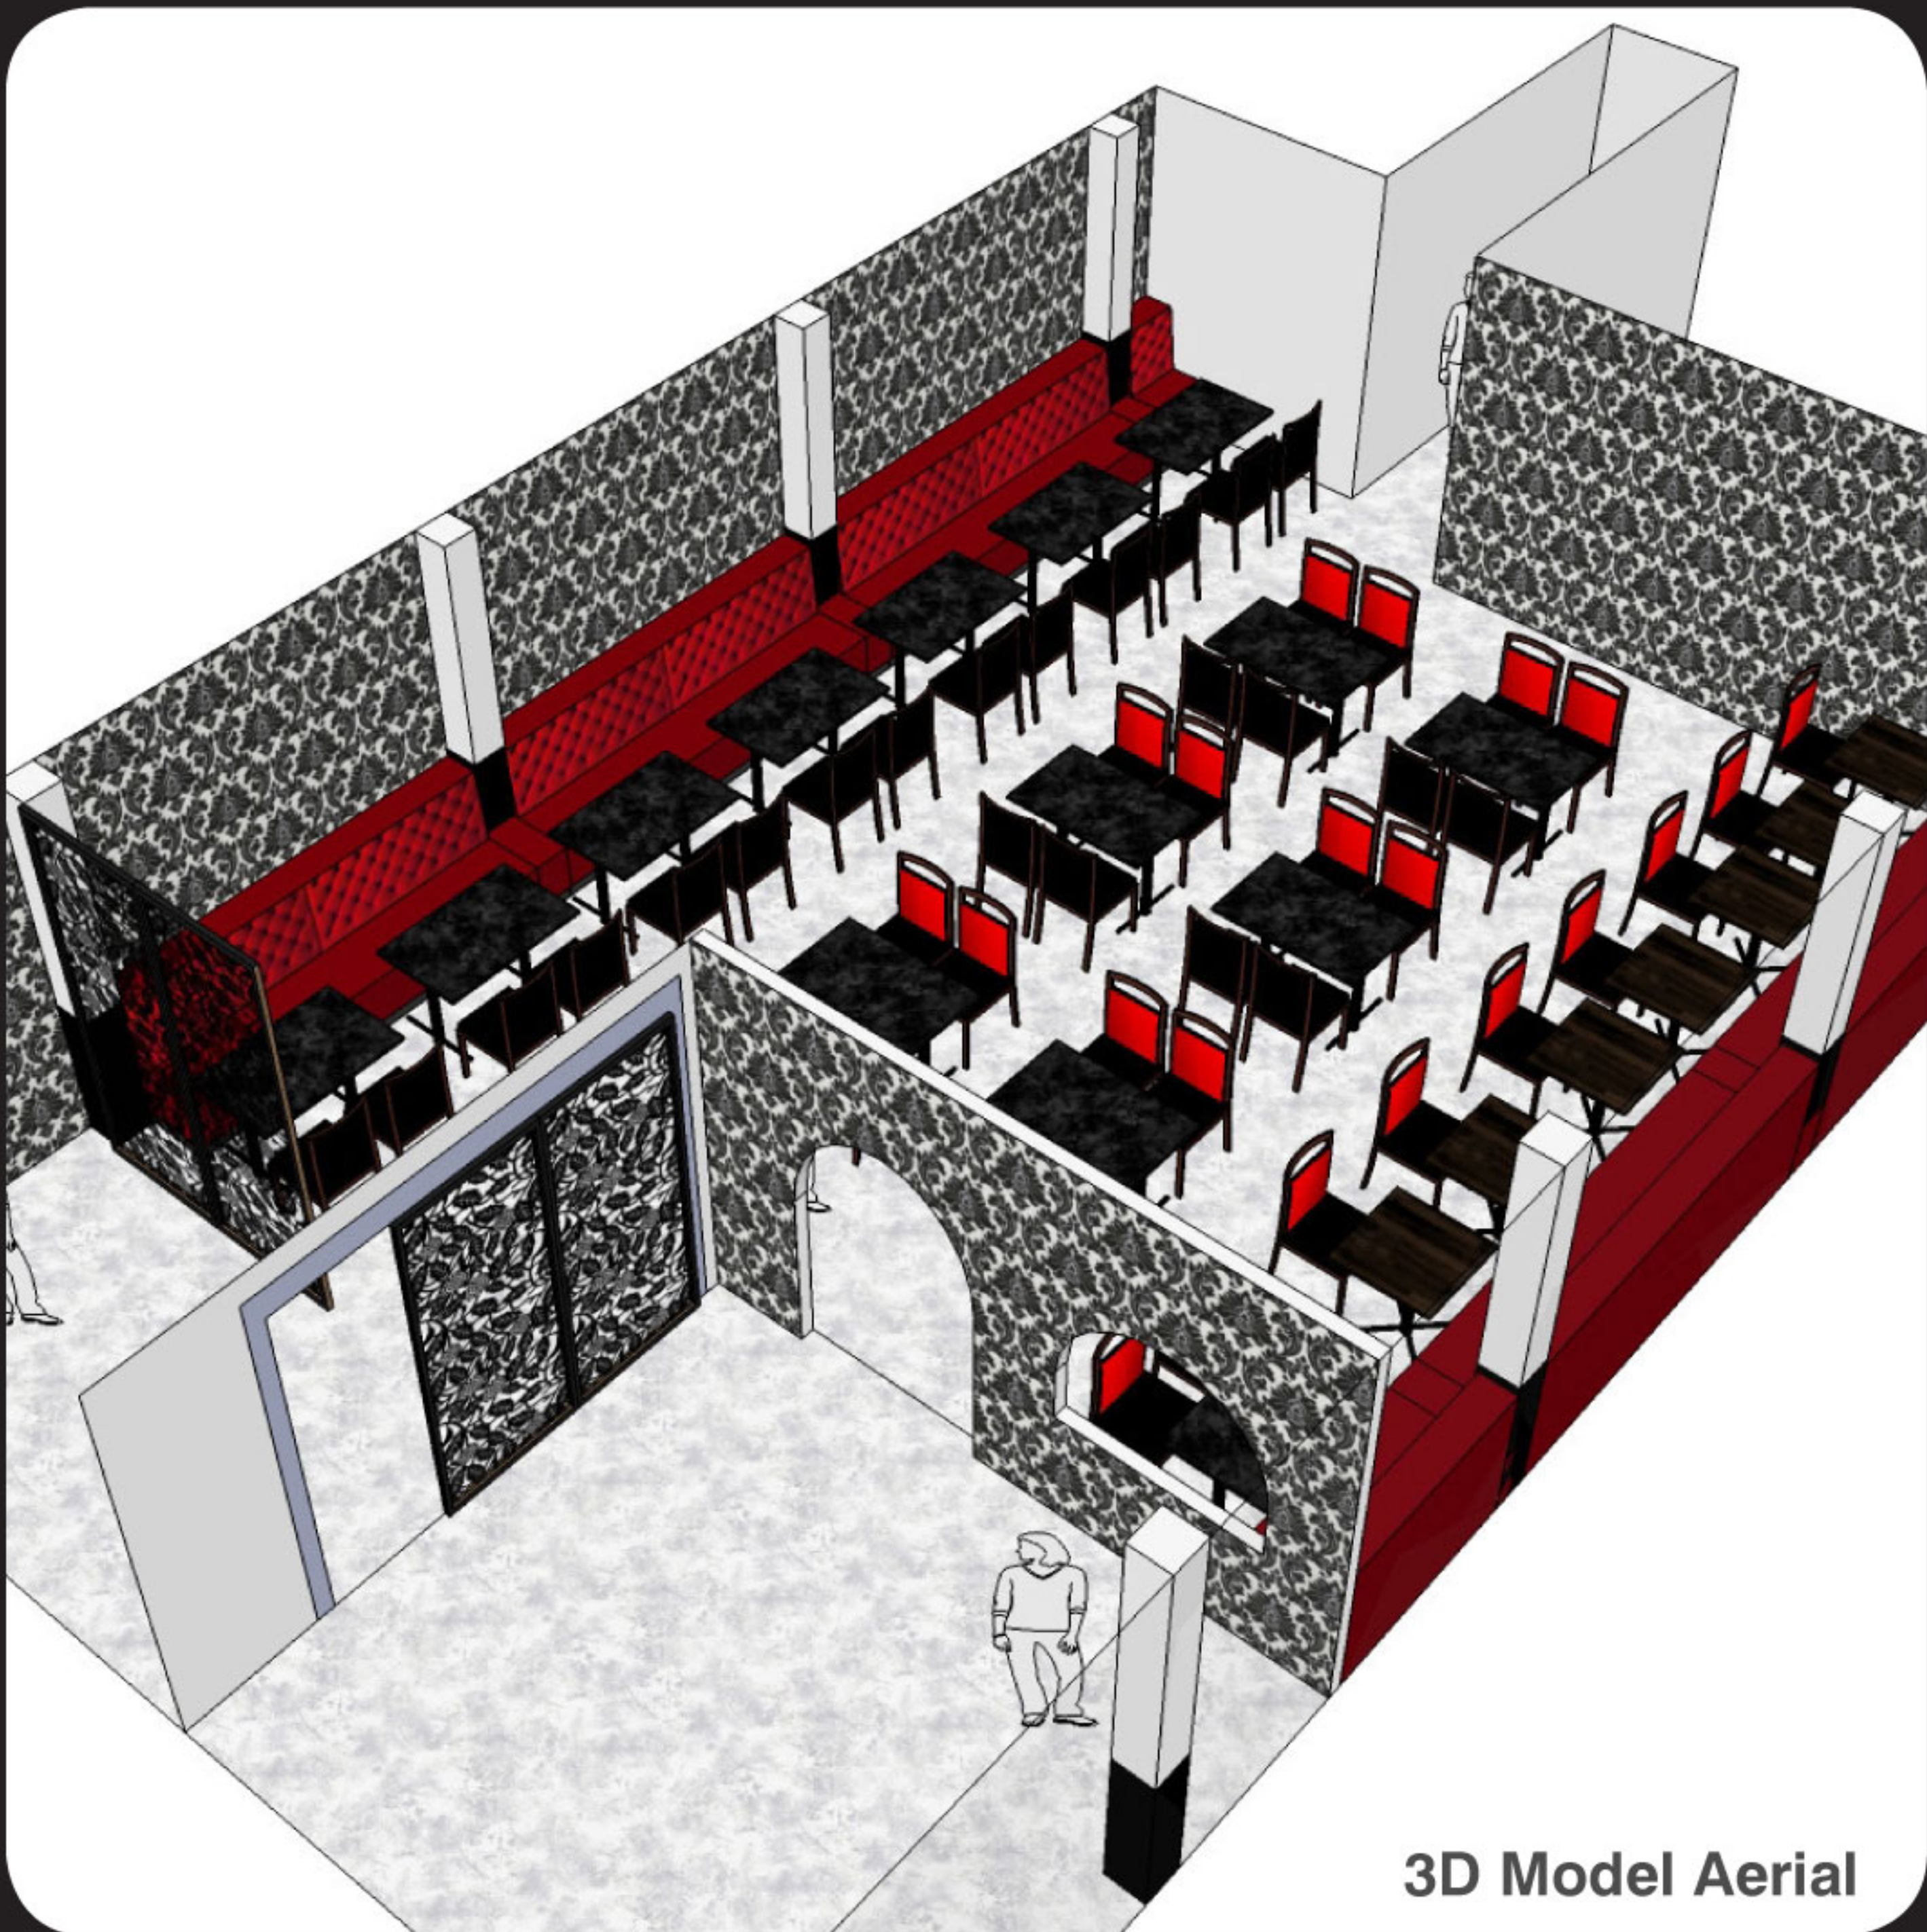

— Shaker (Owner of The Grand Pavilion)

NI HAO

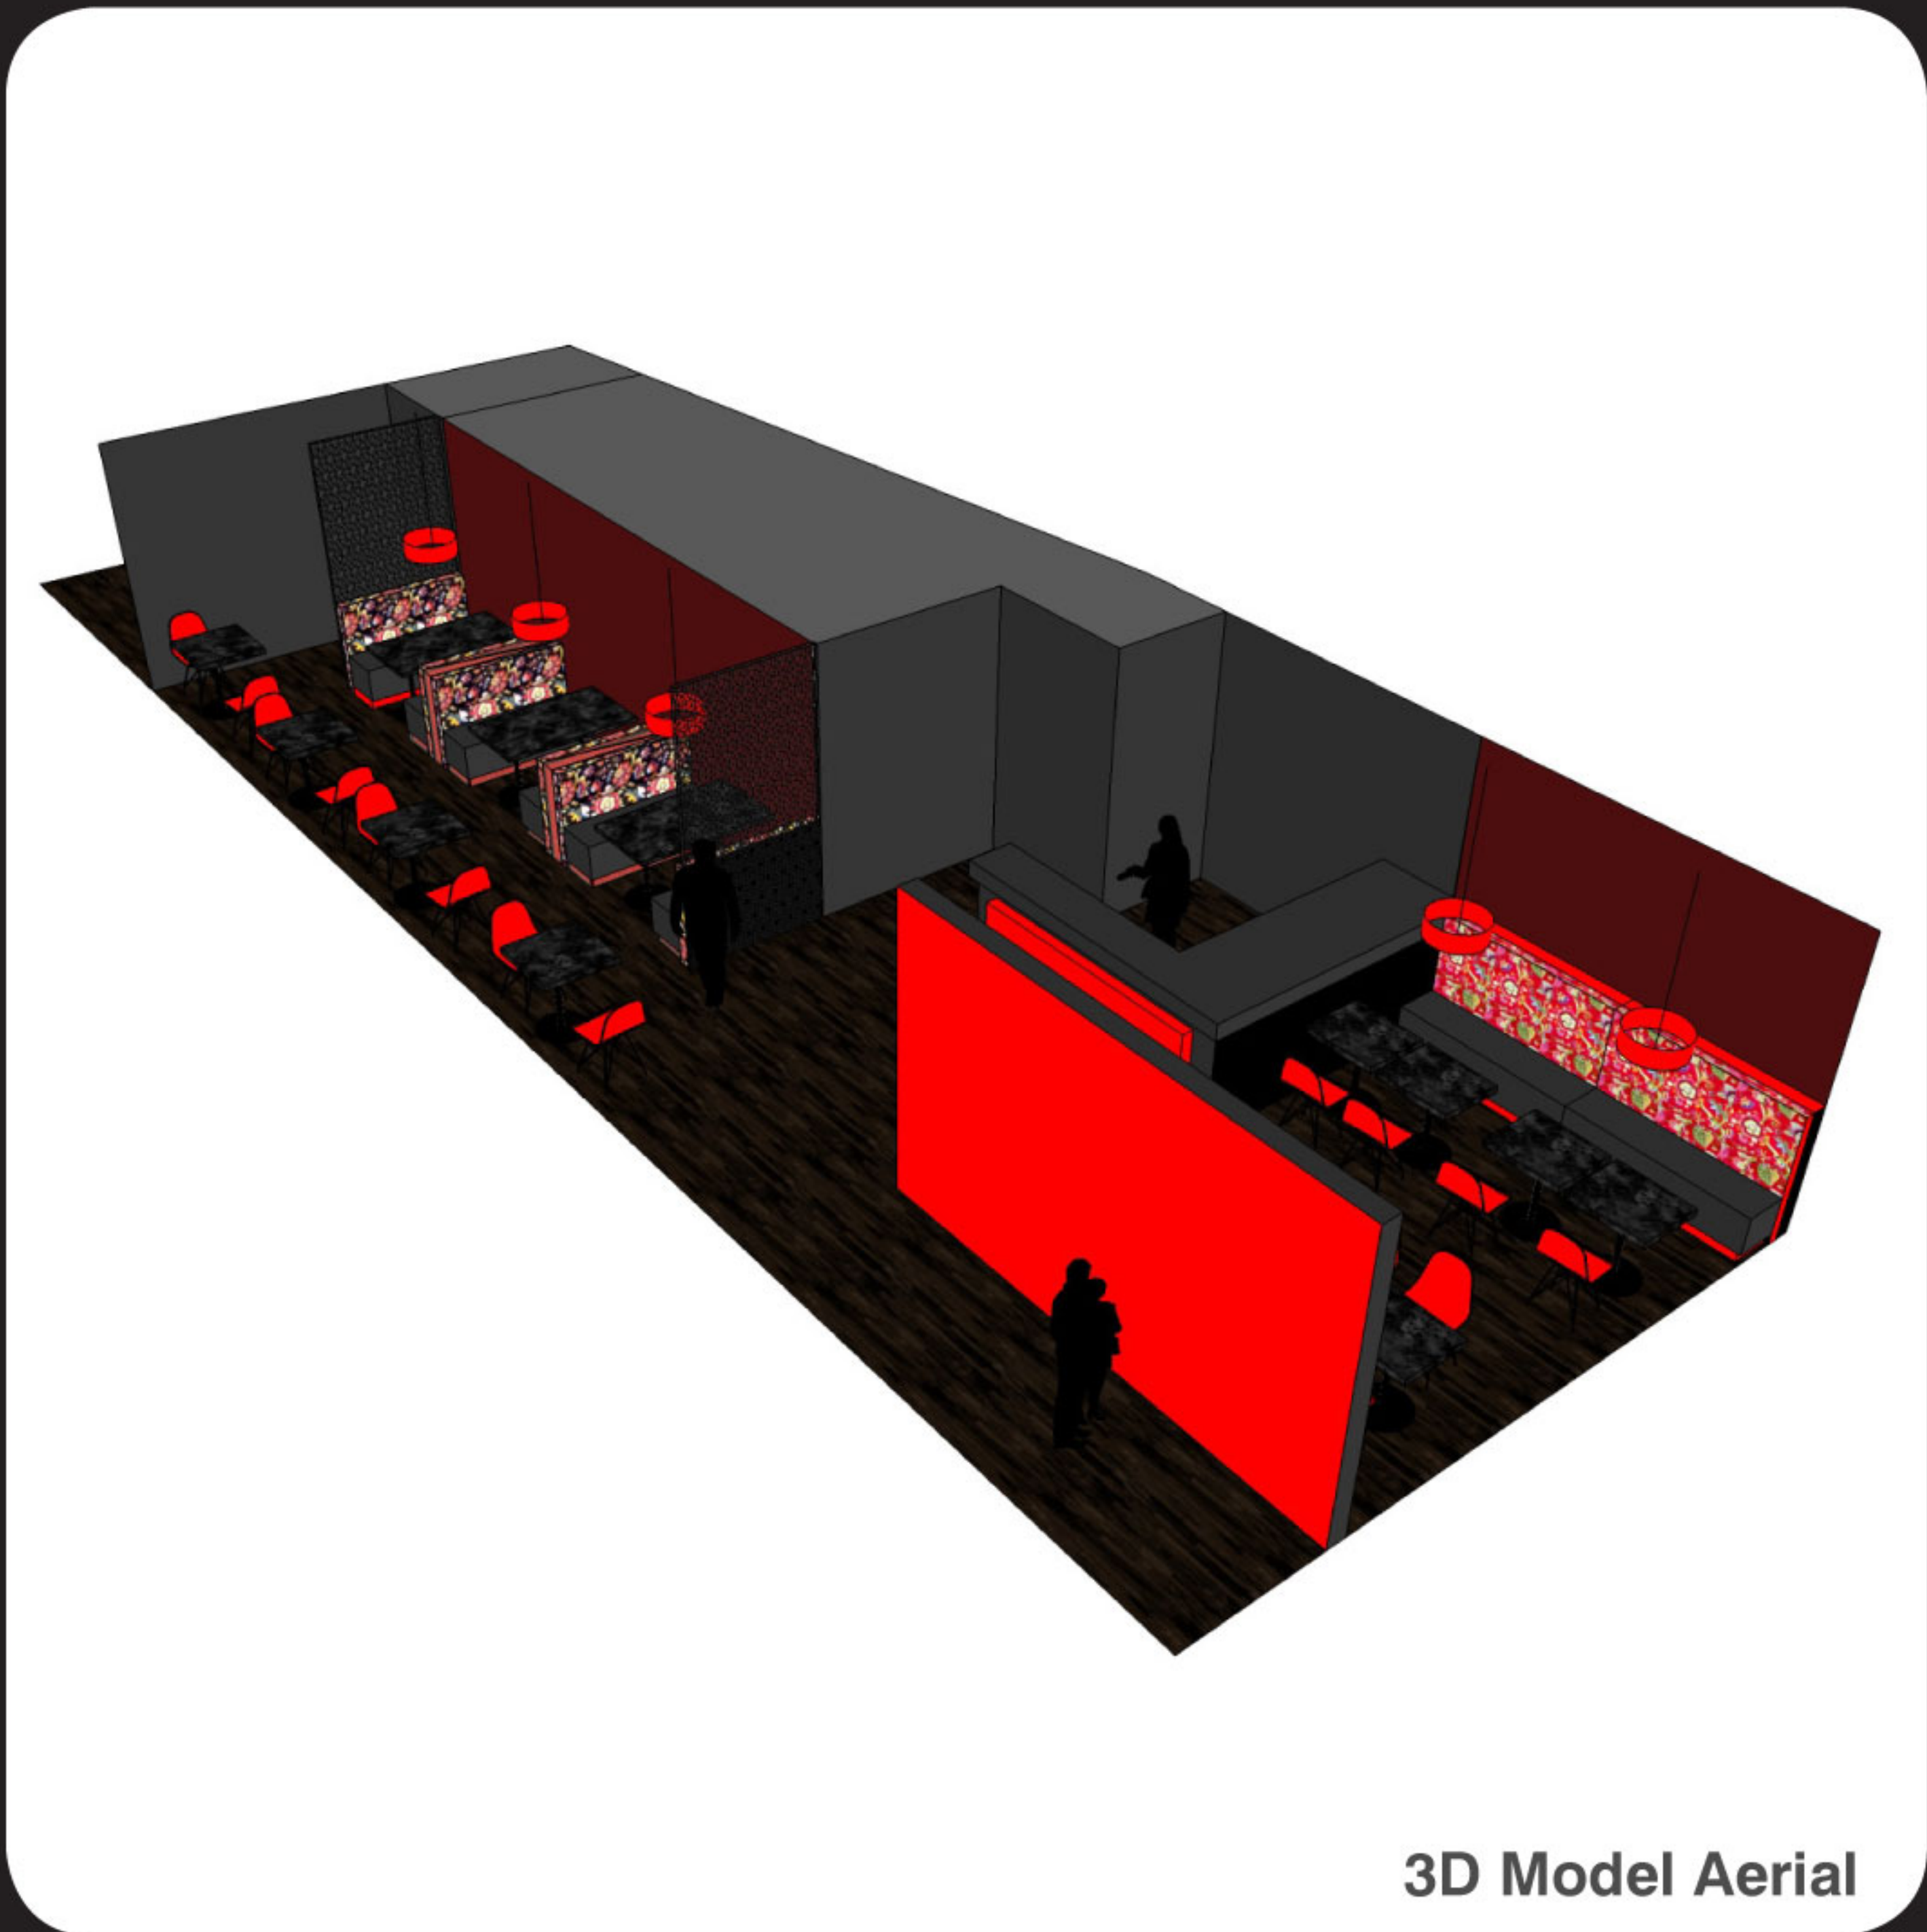

“The workshop helped us get the most seating in our restaurant. We tried different layouts and looks. It helps to choose all the items and finishes the same day, then just wait for it all to arrive. We worked with Jerry on all the marketing and menus. We opened 2 months earlier than expected so very pleased.”
— Charles Hunter (Owner of Ni Hao restaurant)
